Revolution Roofing's True Oak™ 'Super 5' 35mm profile has many applications which can completely transform the appearance of the building. It also benefits from the strength of a 35mm corrugated profile, ideal for commercial applications.

Whether True Oak™ 'Super 5' is chosen for its large spans, resistance to foot traffic or the unrivalled water carrying capacity, 'Super 5' is the ideal solution. Created to match the original 'deep' 6 asbestos profile, True Oak™ is perfect to replace existing asbestos. It's also great when designing a new industrial warehouse or trying to blend a commercial building with a residential zone.

The large corrugations bring a sense of scale to a building where other profiles typically look too busy or industrial. For years, architect designed large commercial buildings looked like giant sheds. Until now. True Oak™ 'Super 5' 35mm offers a rounder, unmatched profile with the ability to be run horizontally, curved over a ridge, or to provide an authentic saw tooth look.

## Benefits of TRUE OAK™ 'Super 5' 35mm

- 121mm x 35mm corrugation for a 735mm coverage.
- Suitable for roofing and walling applications.
- Highly sought after larger area and bolder corrugations.
- A contemporary cousin to the original 'deep' 6 (152mm x 40mm) asbestos profile.
- 50% more water carrying capacity than standard corrugated.
- Available in two gauges; 0.48 and 0.6BMT.
- Capability to go down to a 2 degree roof pitch.
- Stronger underfoot - won't dent under normal foot traffic
- Exclusive to Revolution Roofing.
