FIXING DETAILS

Available Profiles	MAXIMUM INTERNAL SPAN (MM)		
	Ceiling (internal application)	Soffit (external application)	Wall Cladding
True Oak Deep 21mm	1200	900	1500
Corrugated 16mm	900	750	1200
Revspan 700	1200	900	1500
EuroPlus Interlocking Panel	600	600	600
True Oak Mid 10mm	900	750	900

Profiles to be valley fixed using standard fastener patterns.

If necessary a rivet or stitching screw can be used on the overlap. This should not be required based on the above spans however if there is deflection because of the structure being out of square a rivet or stitching screw will help to alleviate any gaps on the overlap.

Revolution Roofing recommend a Black Scrim to be installed behind the True Oak Perforated Ceiling or Wall Sheet (e.g. CSR Bradford Black Regina or equivalent product).

Revolution Roofing continue to offer the widest range of profiles, finishes, and products to the market. The additional strength of True Oak Deep Superior Corrugated and the uncompromising 0.48 BMT Commercial Grade thickness ensures your acoustic lining will be the most robust on the market.
